

OUTDOOR LED DISPLAY SERIES

UltraPanel 9.5mm Pitch

The Ultravision UltraPanel series is a complete line of high-resolution LED display screens that can display digital playback of recorded, live, or static images, including a series of outdoor displays targeting large-scale audiences. Ultravision uses the latest LED display technology to deliver optimized color performance even under direct sunlight conditions. UltraPanels lower energy consumption and extend operating life without high maintenance expenses. Our proprietary video controller software makes orchestrating dynamic and static images from any of the available sources seamless and can even be concurrent. No other technology can deliver a more powerful impression than a super-sized LED display wall - all while allowing the audience to experience the best cinematic performance possible.

- High density applications
- Typical Applications: Digital Billboards, Spectaculars, Outdoor Advertisements, Sports Arenas, and Video Scoreboards

PRODUCT SPECS

Pixel Pitch:	9.525mm
Density (pixel/m ²):	11,022
Pixel Composition:	SMD
View Angle:	120(V), 120(H)
Brightness (Nits):	7,000cd/m ²
Panel Size:	1(H) x 2(W)
Pixels per Panel:	2,048
Pixel Matrix:	32(H) x 64(W)
Panel Weight:	3.5kg

ELECTRIC SPECS

Max Power (per panel):	152W
Avg Power (per panel):	46W
Voltage (VAC):	110V/220V+/15% 50-62HZ
